PROFILE SUMMARY

Software Technology postgraduate with experience in MERN stack, Android development, and machine learning. Built full-stack applications and an AI-based jaundice detection system using sclera image analysis.

EDUCATION

M.Sc. Software Technology - St Aloysius Deemed to be University - CGPA: 7.29	2024 - Present
B.C.A – Padua College of Commerce and Management - CGPA: 7.35	2021 - 2024
Class 12th – Padua Pre-University College – 66%	2019 – 2021

SKILLS

Programming: Java, Python, JavaScript

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js

Mobile Development: Android (Java), Flutter (Basic)

Databases: MongoDB, MySQL, Firebase

Tools & Platforms: Git, GitHub, GitLab, Postman, VS Code, NPM, Docker (Basic), Vercel

APIs & Authentication: REST APIs, JWT Authentication

EXPERIENCE

St Aloysius College – Research Intern Jan 2026 – Present

Tools: Python, OpenCV, Scikit-learn, XGBoost

- Developed a non-invasive jaundice detection system using sclera image analysis and machine learning, achieving ~85% classification accuracy and also trained ML models on 100+ labelled eye images.
- Built an automated Python pipeline for sclera segmentation, reducing manual preprocessing time by ~60%.
- Extracted multiple color features (RGB, HSV, Yellow Index) and trained ML models to estimate bilirubin levels from eye images.
- Improved model performance using data augmentation and SMOTE, increasing detection reliability for imbalanced datasets.

Freelance Project – MERN Stack Travel Website (s4holidays.com) Sep 2025 – Jan 2026

Tools: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Developed a MERN stack travel website with an admin panel for managing 20+ travel packages.
- Implemented secure JWT authentication and REST APIs, enabling role-based admin access and data management.
- Optimized backend queries and UI rendering, improving page load performance by ~30%.
- Deployed the production website on Vercel, delivering a responsive experience across desktop and mobile devices.

Live: <https://s4holidays.com/>

Vision Flow Technology – Frontend Developer Intern Aug 2025 - Nov 2025

Tools: React.js, Tailwind CSS, JavaScript

- Developed a responsive portfolio website using React.js and Tailwind CSS with optimized UI rendering and API integration.
- Integrated backend APIs and optimized frontend rendering to reduce page load time by ~25%.
- Collaborated in an agile team environment, contributing to weekly sprint deliverables and UI improvements.

PROJECT EXPERIENCE

College Study Buddy App | GitHub: <https://github.com/spideyashith/AndriodstudybuddyApp/tree/master>

- Developed an Android study collaboration app with study partner matching, resource sharing, scheduling, and real-time chat using Firebase.
- Implemented Firebase Authentication, Realtime Database, and push notifications for real-time collaboration.

MovieStar – Movie Discovery Web App

- Built a MERN application to explore movies, watch trailers, and manage a personalized watchlist.
- Integrated TMDb API for real-time movie data.
- Implemented JWT authentication for secure user access.
- Developed a responsive UI using React Router and Context API.

POSITION OF RESPONSIBILITY

- Led a 4-member team during an internship at Vision Flow Technologies to build a singer's portfolio website.
- Conducted student-led Android development workshops for BCA students at St Anne's College, Virajpet and St Joseph's College, Hassan, teaching Android basics through hands-on app development demonstrations.

WORKSHOPS & CERTIFICATES

- **AI in Practice: Data-Driven Cardiology & GenAI Models (National Workshop)** – Participated in a hands-on national workshop exploring AI applications in healthcare and generative AI technologies.
- **Robotics Workshop | St Aloysius AIMIT** – Gained practical exposure to fundamental robotics concepts and real-world applications.

HACKATHON & COMPETITIONS

Udbhava 2025 – Nitte Institute of Professional Education, Mangalore

Semi-Finalist | Problem Statement: Mental Health & Stress Management for Law Enforcement

Developed an AI-powered stress monitoring system providing wellness recommendations, peer support, and automated reports.
